Duha Jilani

Oracle & Full Stack Developer

0799547115 | duha.m.jilani@gmail.com | www.linkedin.com/in/duha-jilani | https://github.com/duhamjilani

SUMMARY

Mid-level junior developer proficient in HTML, CSS, and specializing in Oracle Forms, Reports, and ERP systems integration. Proficient in SQL for database management within ERP frameworks. Extensive experience in developing tailored solutions for ERP systems, enhancing efficiency and streamlining operations. Skilled in the MERN stack and React, with a meticulous approach to design and a commitment to delivering user-centric applications. Strong problem-solving skills and effective communication abilities ensure successful ERP implementations and optimal business outcomes

EXPERIENCE

Oracle Developer-ERP system   **January 2024- Present**
Royal Scientific Society ,Amman

- Developed intuitive and responsive user interfaces using Oracle Forms (12c).

- Generated complex reports with Oracle Reports (12c) for comprehensive data analysis and visualization.

- Utilized SQL for data manipulation, retrieval, and management within Oracle databases.

- Programmed in PL/SQL to create stored procedures, triggers, and functions for efficient data processing and application logic.

- Analyzed requirements and designed solutions in collaboration with cross-functional teams.

- Optimized database performance through SQL tuning and query optimization.

- Integrated Java classes within Oracle Forms to enhance functionality.

- Implemented HTML, CSS, and JavaScript within Oracle Forms for enhanced user interfaces.

- Quickly adapted to new Oracle technologies and tools as needed.

Oracle Developer   **September 2023- December2023**
ICS Financial Systems ,Amman

- Developed responsive user interfaces for financial systems using Oracle Forms (11g).

- Managed data within Oracle databases using SQL.

- Programmed PL/SQL stored procedures, triggers, and functions for data processing and application logic.

- Designed and delivered high-quality Oracle-based software products in collaboration with cross-functional teams.

- Enhanced database performance through SQL tuning and query optimization.

- Demonstrated basic knowledge of banking systems.

- Quickly learned new Oracle technologies and tools.

Trainee at Coding Academy   **February 2023- September2023**
Orange ,Amman

- Successfully completed of 10 projects utilizing various technologies, showcasing proficiency across different tech stacks.

- Collaborated effectively within cross-functional teams and delivering exceptional results through strong teamwork and collaboration.

- Took on the role of Scrum Master, leading agile methodologies and facilitating efficient project management, resulting in streamlined workflows and enhanced productivity.

- Built responsive webpages using HTML, CSS, JavaScript, and Bootstrap, creating visually appealing and user-friendly interfaces that optimized the user experience.

- Leveraged React to develop engaging and dynamic websites, using the power of this popular front-end library to deliver interactive and highly functional web applications.

EDUCATION

Orange Coding Academy   February 2023
Full Stack Developer

Hashemite University   January 2023
Bachelor in Computer Science with GPA (3.01) very good

SKILLS

- Front-end: HTML, CSS, JavaScript, React, Bootstrap

- Back-end: Node.js, Express.js

- Database: MongoDB, Oracle Database, SQL

- Programming: PL/SQL, OOP, JAVA , SOLID principles

- Other: Quick learner, Excellent communication, Organizational skills, Creative

- Languages: Arabic (native), English (very good)

PROJECTS IN ORANGE CODING ACADEMY

- **Jewelry Store:** Developed an e-commerce website for purchasing jewelry and accessories. Implemented React components, HTML, CSS, and Bootstrap to create a visually appealing and user-friendly platform. The website offers a wide range of products, secure payment options, and a seamless shopping experience.

- **GitHub Finder:** Created a GitHub clone that allows users to search for GitHub users by their names and compare them based on the number of repositories or followers. Built using HTML, CSS, and JavaScript, the application provides an intuitive user interface for finding and analyzing GitHub profiles, aiding in discovering and connecting with developers.

- **Quiz App:** Developed a quiz application for users to test their knowledge in English and technical subjects. The app enables users to answer a series of questions and provides immediate feedback, displaying their scores at the end. Implemented using HTML, CSS, and JavaScript, the quiz app offers an interactive and engaging learning experience.

- **Tours :** Created a tourism tours website with MERN stack (express js,mongodb,node js react), tourism tours website harmonizes adventure and technology. Tour guides effortlessly present their tours, enriched with multimedia, while travelers enjoy swift and secure reservations through JWT authentication

- **Snap In:** Developed an HR system application for tracking employee check-ins and check-outs, managing vacation and sick leave requests, and providing salary information. The application includes a dashboard for process control. Implemented using HTML, CSS, JavaScript, React Native, Node.js, and MongoDB to create a comprehensive and efficient HR management tool.
